

auLika OFFICE

Description

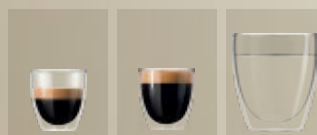

Aulika is the line of coffee machines for the OCS and Ho.Re.Ca. markets, fully expressing the excellent quality of Saeco technology.

All models include the best professional solutions, such as the high capacity of the water and coffee tanks and the professional certification; all this guarantees the best performance and highest reliability, extremely important in location with high daily consumption.

The wide graphic display, designed to manage both icons and text in different languages, and the interface (equipped with large, easy to understand direct selection buttons) make it possible to use and program the machine easily; maintenance and cleaning operations, too, are made easy by the fact that all the parts that require regular care are removable.

Aulika Office can dispense coffee and hot water. It also includes the base with extra capacity for grounds collection.

Aulika is the Saeco range addressed at the most demanding out of home professionals.

Main features

- High capacity containers for professional use (4 l water, 1 kg coffee beans)
- User interface with graphic display and 3 direct selection buttons
- Independent hot water wand
- Wide programming menu in the local language, with credit management capability
- Professional certification pursuant to the 60335-2-75 standard

Aulika Office

Dati tecnici

Structural characteristics
